

« Bio-Logic SAS is manufacturing and distributing through its network potentiostats/galvanostats systems dedicated to process control and research in Electrochemistry and Corrosion.

Real VSP and VMP3 Multichannel potentiostats permit Multitasks measurements including EIS both in Single Sine and MultiSine, Multipitting, ZRA following ASTM standards.

All potentiostats are driven by first class EC-Lab® software providing analysis tools for acquired or imported data. The full range of SP potentiostats with current boosters gives access to new grade of research studies, we will be please to welcome you on our booth number A7 “
