Company Profile

Hockway Ltd is an experienced designer and manufacturer of quality cathodic protection systems. Cathodic Protection is highly effective in the control and prevention of steel corrosion. Over the past 35 years Hockway have built up an international reputation for excellence and are now one of the global leaders in the market. Hockway offer a complete CP package from initial investigative survey through engineering design, manufacture of equipment, site installation and commissioning of systems with subsequent planned operational inspection and maintenance. Hockway has recently been building a number of regional offices throughout the Middle East to support our clients more effectively.
